

Harsh Kotak

9521 Halstead Ln, Lone Tree, CO 80124 | Cell: +1 (720)519-9024 | Email: harsh.kotak9@gmail.com | Web: iKotak.com

PROFESSIONAL SUMMARY:

- Over 5 years of experience in Telco and Cable Service Provider environment.
- Broad experience in the fields of datacenter networking, compute, storage, virtualization and containerization technologies.
- Well versed with datacenter routing, switching, load balancing architectures and protocols.
- Experience with installation, configuration and operation of network devices such as Cisco, Arista, Juniper and Cumulus.
- Knowledge and experience in SDN, NFV, service orchestration, distributed cloud, CI/CD and cloud native architectures.
- Ability to program and troubleshoot customized ansible, terraform, python and bash scripts.
- Experienced working in lab and QA environments to test and validate solutions for a multi-vendor ecosystem.
- Equipped with Linux system administration experience including configuration, troubleshooting and maintenance.
- Possess good communication and analytical skills with an appetite to grasp new concepts quickly.
- Worked with Agile/Scrum methodology for development and experience using ticketing tools.

TECHNICAL SKILLS:

Programming Languages: Python, Bash
Routing Protocols: RIP, OSPF, BGP, MPLS
Switching: VLAN, STP, LACP, MC-LAG, FabricPath, FHRP
Miscellaneous: TCP/IP, ARP, ACL, NAT, WAN, VRF, VXLAN, IPv6
Network Management: SNMP, DHCP, DNS, NTP, IPAM, iPerf, AAA, NetFlow, Tcpdump, Wireshark
Cloud Platforms: OpenStack (TripleO, Kolla-Ansible), KVM, VMware, AWS, Ceph, AVI, Juniper Contrail, Nokia Nuage
Packet Acceleration: SR-IOV, DPDK, VPP, NUMA, OVS Offload, SmartNICs
Container Orchestration: Docker, Kubernetes, Helm, Rancher, Portworx
Software Tools: Ansible, Terraform, Git, Jenkins, RH Satellite, EVE-NG, Ixia, TRex, Cloudify, vRealize, UCS Manager

EXPERIENCE:

Network Engineer III

June 2016 – present

Charter Communications (Spectrum)

Denver, CO

- Working on the datacenter network, NFV and platform architecture team at Charter Advanced Engineering.
- Responsibilities include planning, design, implementation and optimization of network systems.
- Worked on developing Python Django based utility around terransible to create, configure and destroy Kubernetes clusters. The project also performed integration tests intended to be run by a pipeline.
- Evaluate, test, and design all components of NFV including NFVI, SDN and MANO for edge and datacenter use cases.
- Certified use of packet acceleration technologies and SmartNICs for OpenStack and NFV cloud.
- Developed ansible playbooks to automate provisioning and management of Red Hat OpenStack clouds.
- Worked on installation, configuration, administration, and troubleshooting of OpenStack and Ceph.
- Developed test cases and performed certification testing of datacenter switching platforms.
- Worked on redesign, build and management of the lab consisting 70+ racks of infrastructure from the ground up including network, compute, storage, virtualization and shared services.
- Collaborate with different video and software engineering to standardize solution and implementation options.
- Created and reviewed design specification, system builds, configuration and associated documentation.

Automation Engineer Intern

May 2015 – August 2015

Comcast Cable

Denver, CO

- Worked within the EPS Voice Engineering department of Comcast to automate tasks and support Big Data Analytics.
- Developed stored procedures and ETL tools in Microsoft SQL Server to process CDR and other usage data from switches.

EDUCATION:

Masters in Telecommunications Engineering

GPA 3.7 / 4.0

University of Colorado Boulder

August 2014 – May 2016

Bachelors in Electronics & Telecommunication Engineering

GPA 3.6 / 4.0

University of Mumbai

August 2010 - June 2014

CERTIFICATIONS: CCNP Enterprise, CCNA Routing and Switching, IPv6 Forum (Silver), OCI Foundations
